

**Warning: Movie spoiler alert!**

## *Tomorrowland*

1. *Tomorrowland* is a science fiction movie that warns the end is coming for this earth, as well as the imaginary other-dimension world of Tomorrowland. Young Frank invented a jetpack he thought would help the world when he was a kid, but why does Casey really go looking for him 50 years later? What is the difference between her dad's attitude toward NASA closing down and Casey's?
2. Why does Casey persist in her goal to save not only NASA but Tomorrowland, too? What is at stake for humanity and the earth?
3. Who is Athena? What function does she carry out in the story? This might sound like a trick question, but what does her character say about what it means to be human?
4. Look up and discuss the meaning of the names Athena, Casey, and Nix. How do their names reflect their roles in the story? Why do you think names may be important in films? (Take a minute and look up your name; does it have a special meaning for you or your parents? Be sure to ask them why they gave you your name.)
